DETAILED ACTION

Allowable Subject Matter

1. Claims 1-34 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or make obvious the step of or means for "determining if there is a trunk group within the source switch having a virtual path identifier that matches the virtual path identifier of the virtual path aggregation", when the determining is considered within the specific structure of the method recited in claim 1 or the device recited in claim 8. The prior art of record fails to teach or make obvious the step of or means for "determining if the connection is a virtual channel connection type, when the connection is a virtual channel connection type, determining if the service category for the connection is supported by the virtual path aggregation", when the determining is considered within the specific structure of the method recited in claim 14 or the device recited in claim 18. The prior art of record fails to teach or make obvious the step of or means for "comparing bandwidth characteristics included in the traffic descriptor of the virtual path aggregation with bandwidth limitations of the trunk group", when the comparing is considered within the specific structure of the method recited in claim 22 or the device recited in claim 29.
